The foregoing election is made with traverse. According to the MPEP, where claims can be examined together without undue burden, the Examiner must examine the claims on the merits even though they are directed to independent and distinct inventions. See, the MPEP at § 803.01. The claims set forth in Groups I-III stem from a common concept and theory. Thus, a proper search of the subject matter of Group I would likely identify art related to Groups I-III. Accordingly, the search would not place an undue burden on the Examiner. Applicants therefore request reconsideration of the restriction requirement.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,
